21 April 2015

Meat Traders

Dear Sir / Madam

**OUTBREAKS OF AVIAN INFLUENZA (AI) IN WISCONSIN AND IOWA, USA**

USA reported outbreaks of H5N2 Highly Pathogenic Avian Influenza (HPAI) in a commercial egg layer flock in Jefferson County, Wisconsin and a commercial turkey flock in Buena Vista County, Iowa.

In view of the outbreaks, AVA will impose a temporary restriction on the importation of poultry and poultry products from Wisconsin State and Iowa State with immediate effect. Heat-processed poultry products, which meet the requirements for heat inactivation of AI virus, will not be affected. For import from unaffected areas in USA, additional certification is required on the veterinary health certificate as listed on Annex 1.

Please contact Ms June Koh or myself at 6805 2856 / 6805 2854 should you have any enquiries on the import of poultry and poultry products.

Yours faithfully

Li Lu  
Executive Manager (Food)  
Quarantine & Inspection Group  
for Director-General  
Agri-Food and Veterinary Services

## **Annex 1**

The additional certification should state on the Veterinary Health Certificate:

- a. Highly pathogenic avian influenza (HPAI) and H5 and H7 low pathogenicity avian influenza (LPAI) are notifiable diseases in the country of export.
- b. The birds from which the meat was sourced were not vaccinated against H5 and H7 subtypes of avian influenza (AI), as defined by the World Organisation for Animal Health (OIE).
- c. The poultry meat and meat products were not derived from birds originating from Iowa, Wisconsin, North Dakota, South Dakota, Montana, Kansas, Arkansas, Missouri, Minnesota, California, Idaho, Oregon or Washington States.
- d. The poultry from which the meat was derived were born, raised, and slaughtered in USA, or were legally imported as day old chicks from countries with equivalent poultry health status.
